Colleges1 Dump Analysis

Insights & Business Observations

Data Period: Mar 2025 – Aug 2025 | **Total Records:** 31,314 Leads

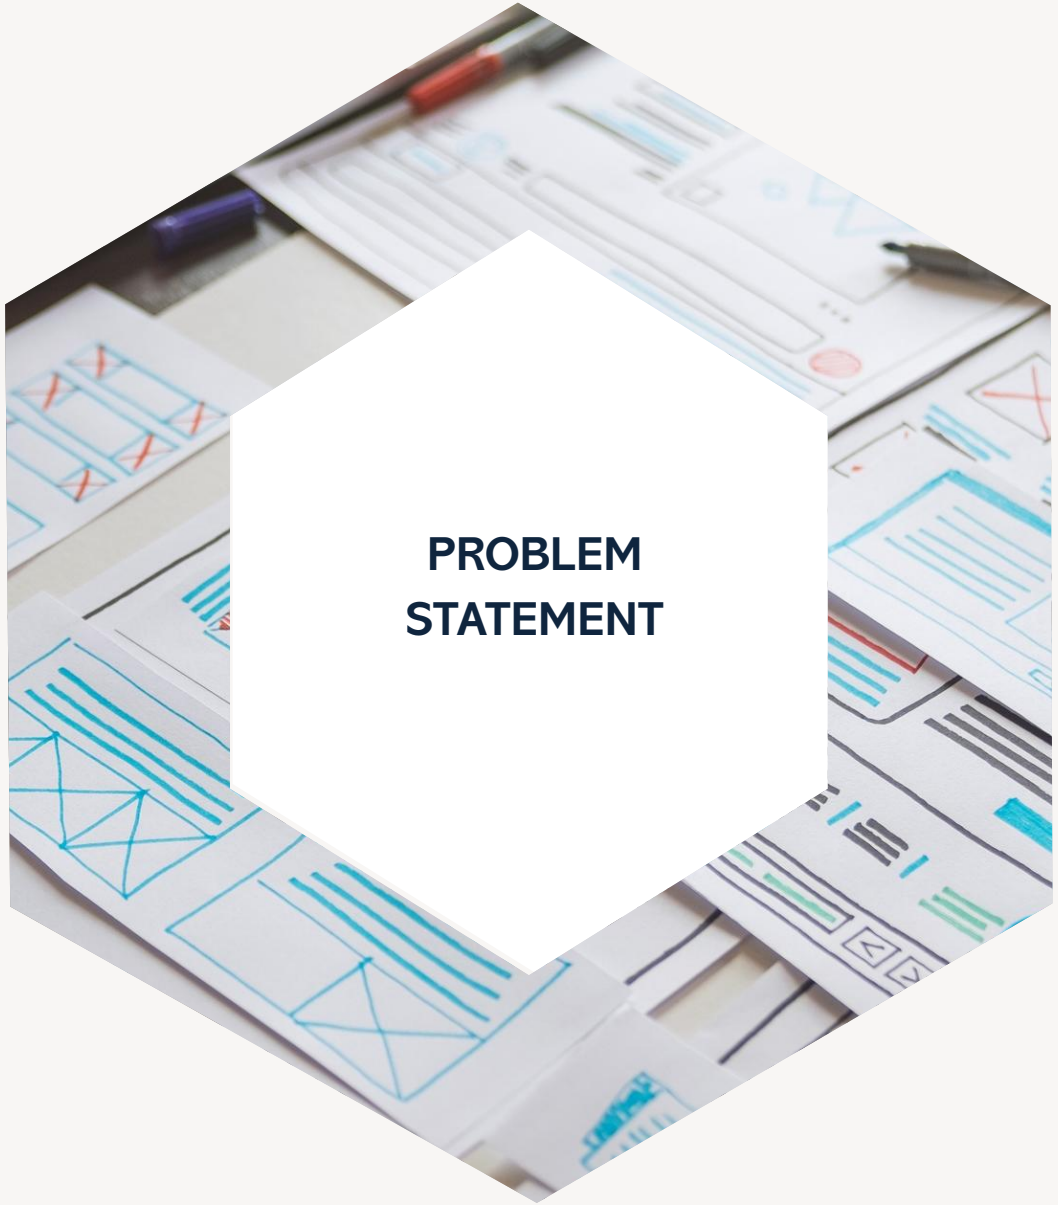
Agenda

- Overview
- Problem Statement
- Key Insights
- Recommendation
- Summary

Overview

- In Today's time there are lots of competition between all colleges and they generate lots of students leads.

- This project focused on the colleges lead data to analyze raw data to actionable business Insights and Recommendation into Student's behaviors, conversion rate, demographic analysis for meaningful business insights for better Decision-making



PROBLEM STATEMENT

The institution faces lots of challenges like unstructured data, lacks of facing visibility in admission funnel and difficulty in identify the demographic drop offs and high performing Region.

This results in inefficient decision-making and missed opportunities for improving conversions. Although, we have to Give the problem Analysing Report to the Institution.

EXECUTIVE SUMMARY

Total Leads

31,314

All records

Verified

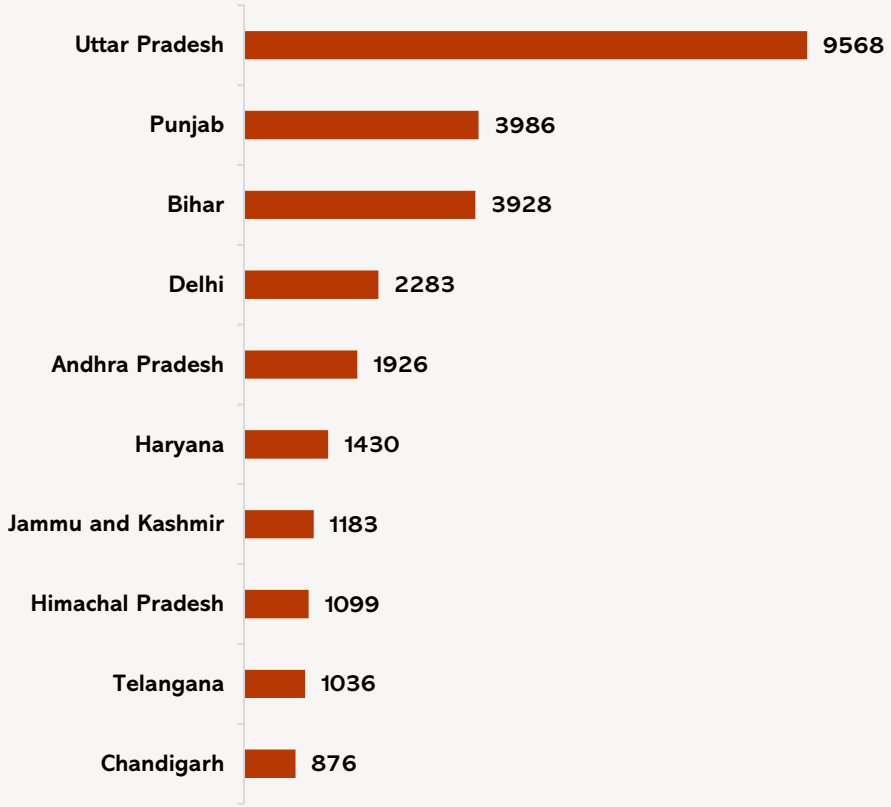
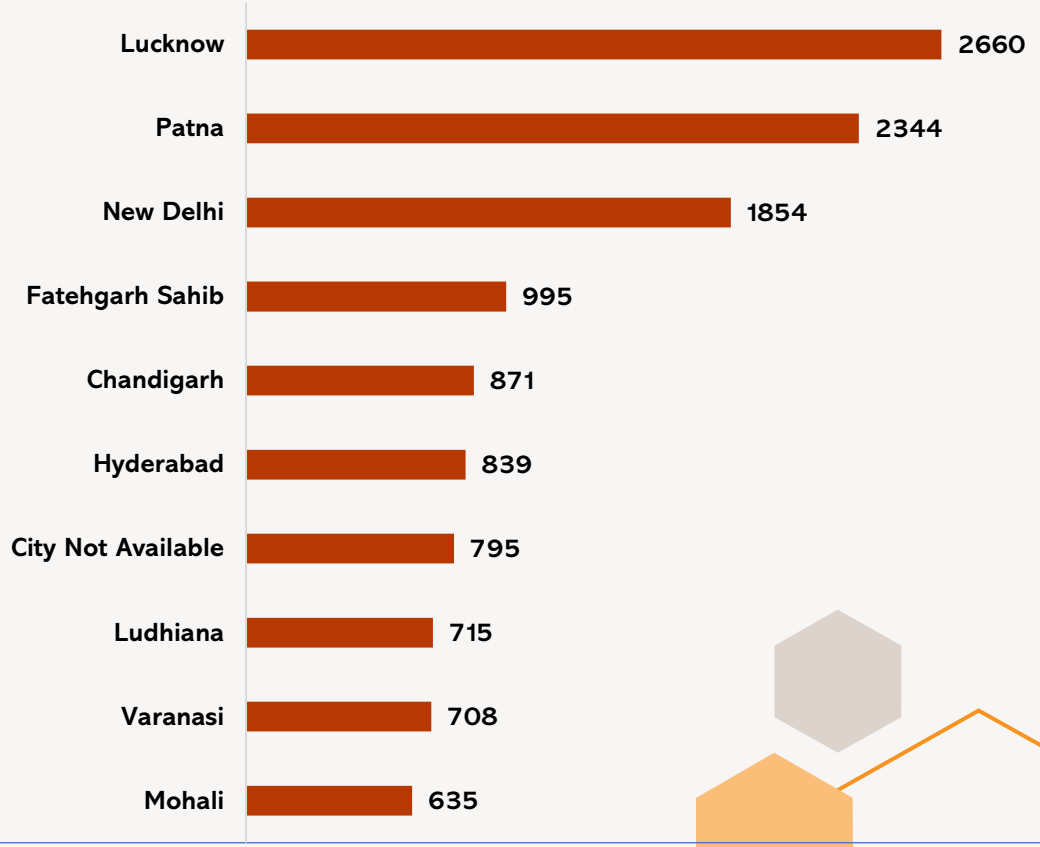
Geographic Distribution Of leads

High Performing States



High Performing Cities

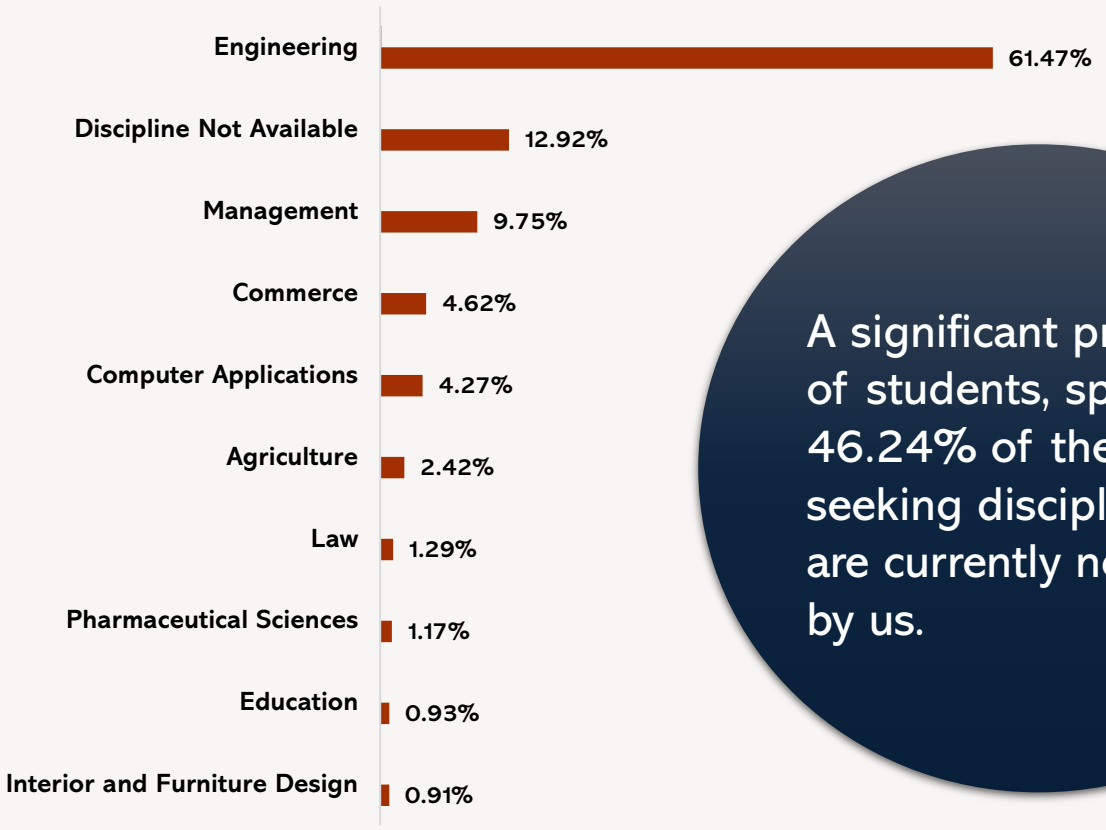


- Top 3 states (UP, Punjab, Bihar) account for 55.7% of all leads. North India dominates -- regional outreach strategies should prioritise these markets.

- Top 3 cities (Lucknow, Patna, New Delhi) account for 21.9% of all leads. North & Center dominates -- regional outreach strategies should prioritise these markets.

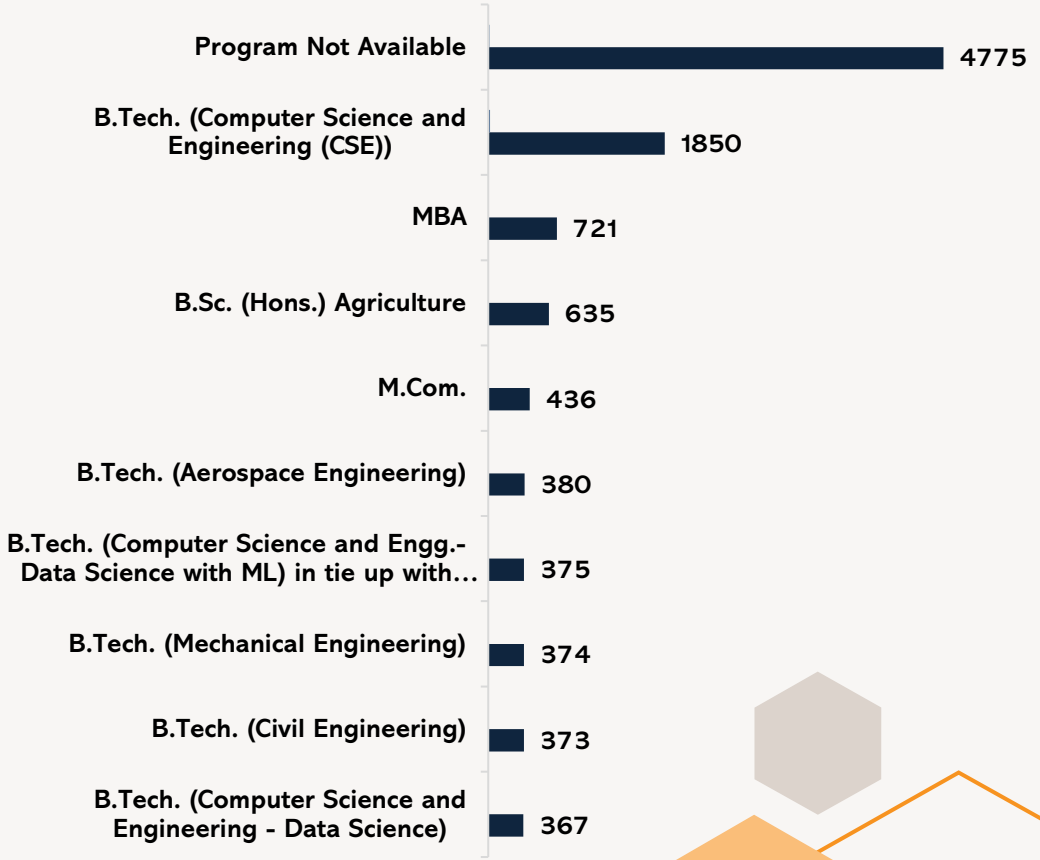
Discipline & Program Interest Analysis

Discipline Interest



A significant proportion of students, specifically 46.24% of the total, are seeking disciplines that are currently not offered by us.

Top Programs



Engineering, Management & Commerce are the Top discipline choice for the students which is total 75.8% . So, we can have to target this discipline's students and do campaign and ads .

B.Tech, MBA & B.Sc.(Agr) are the Top Program choice for the students which are 30.6% of the total program.

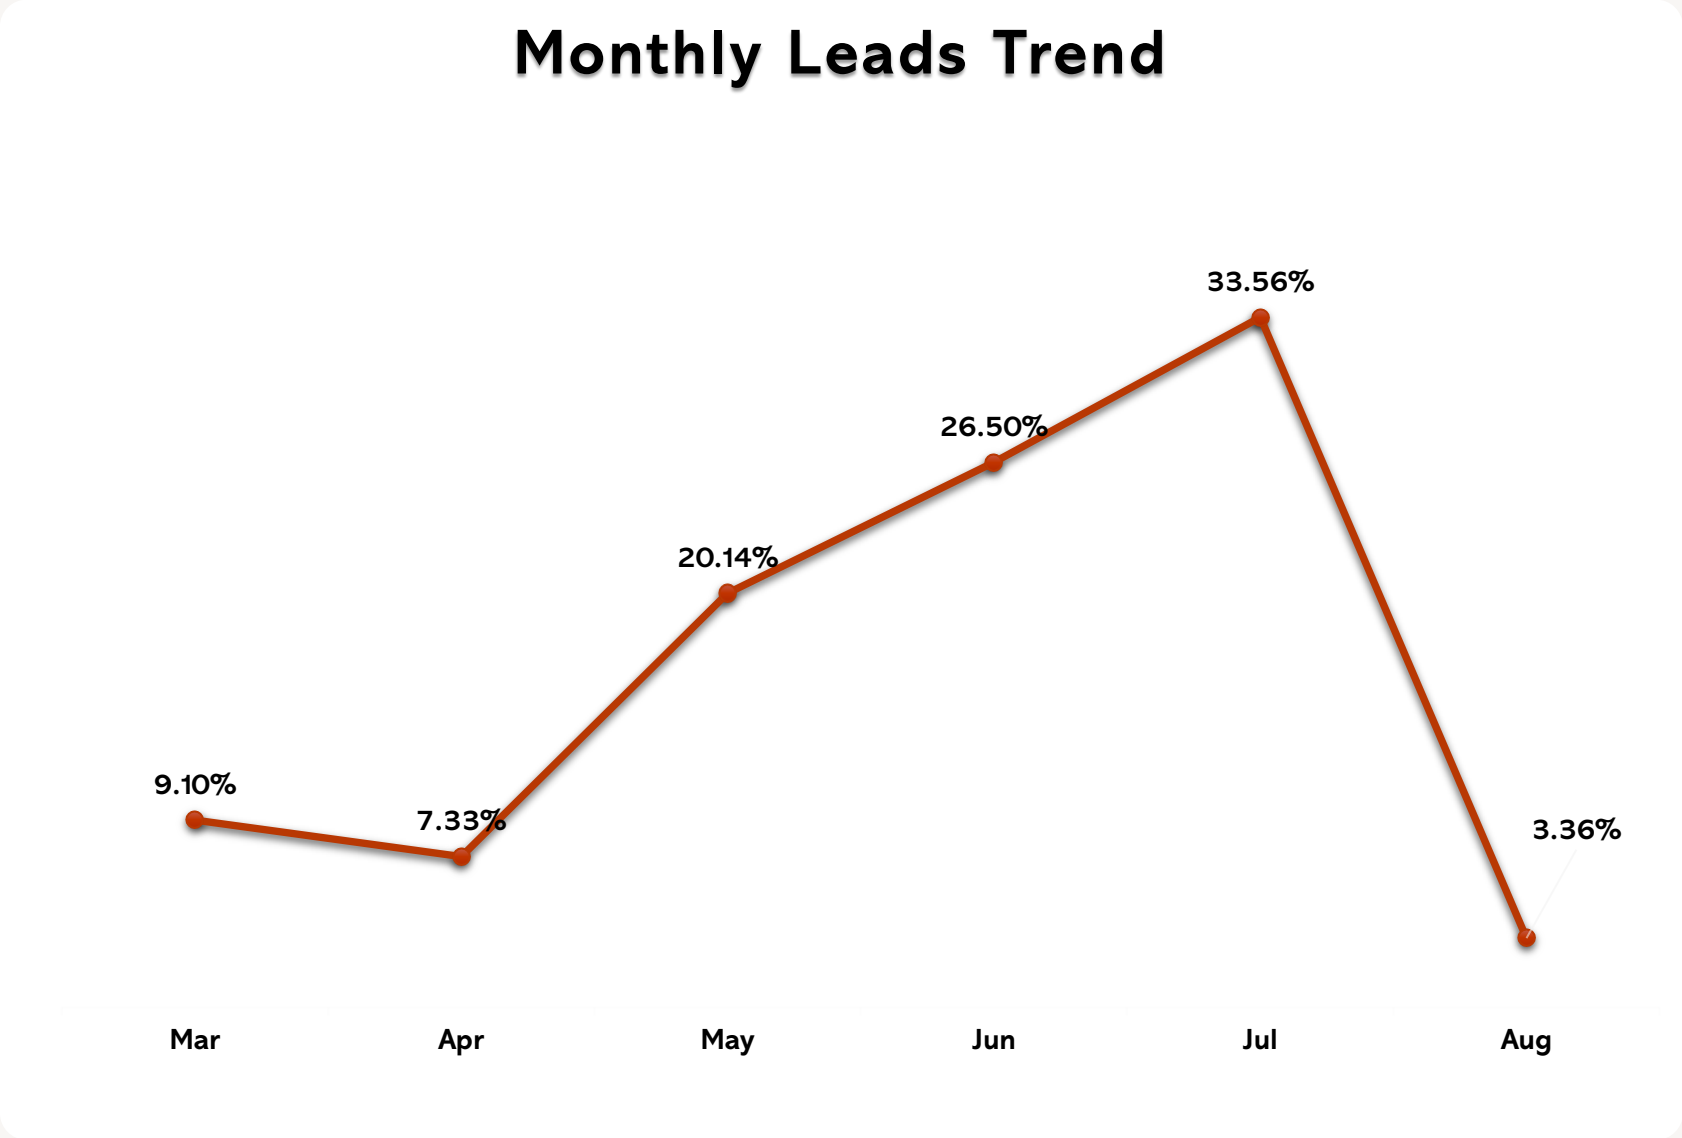
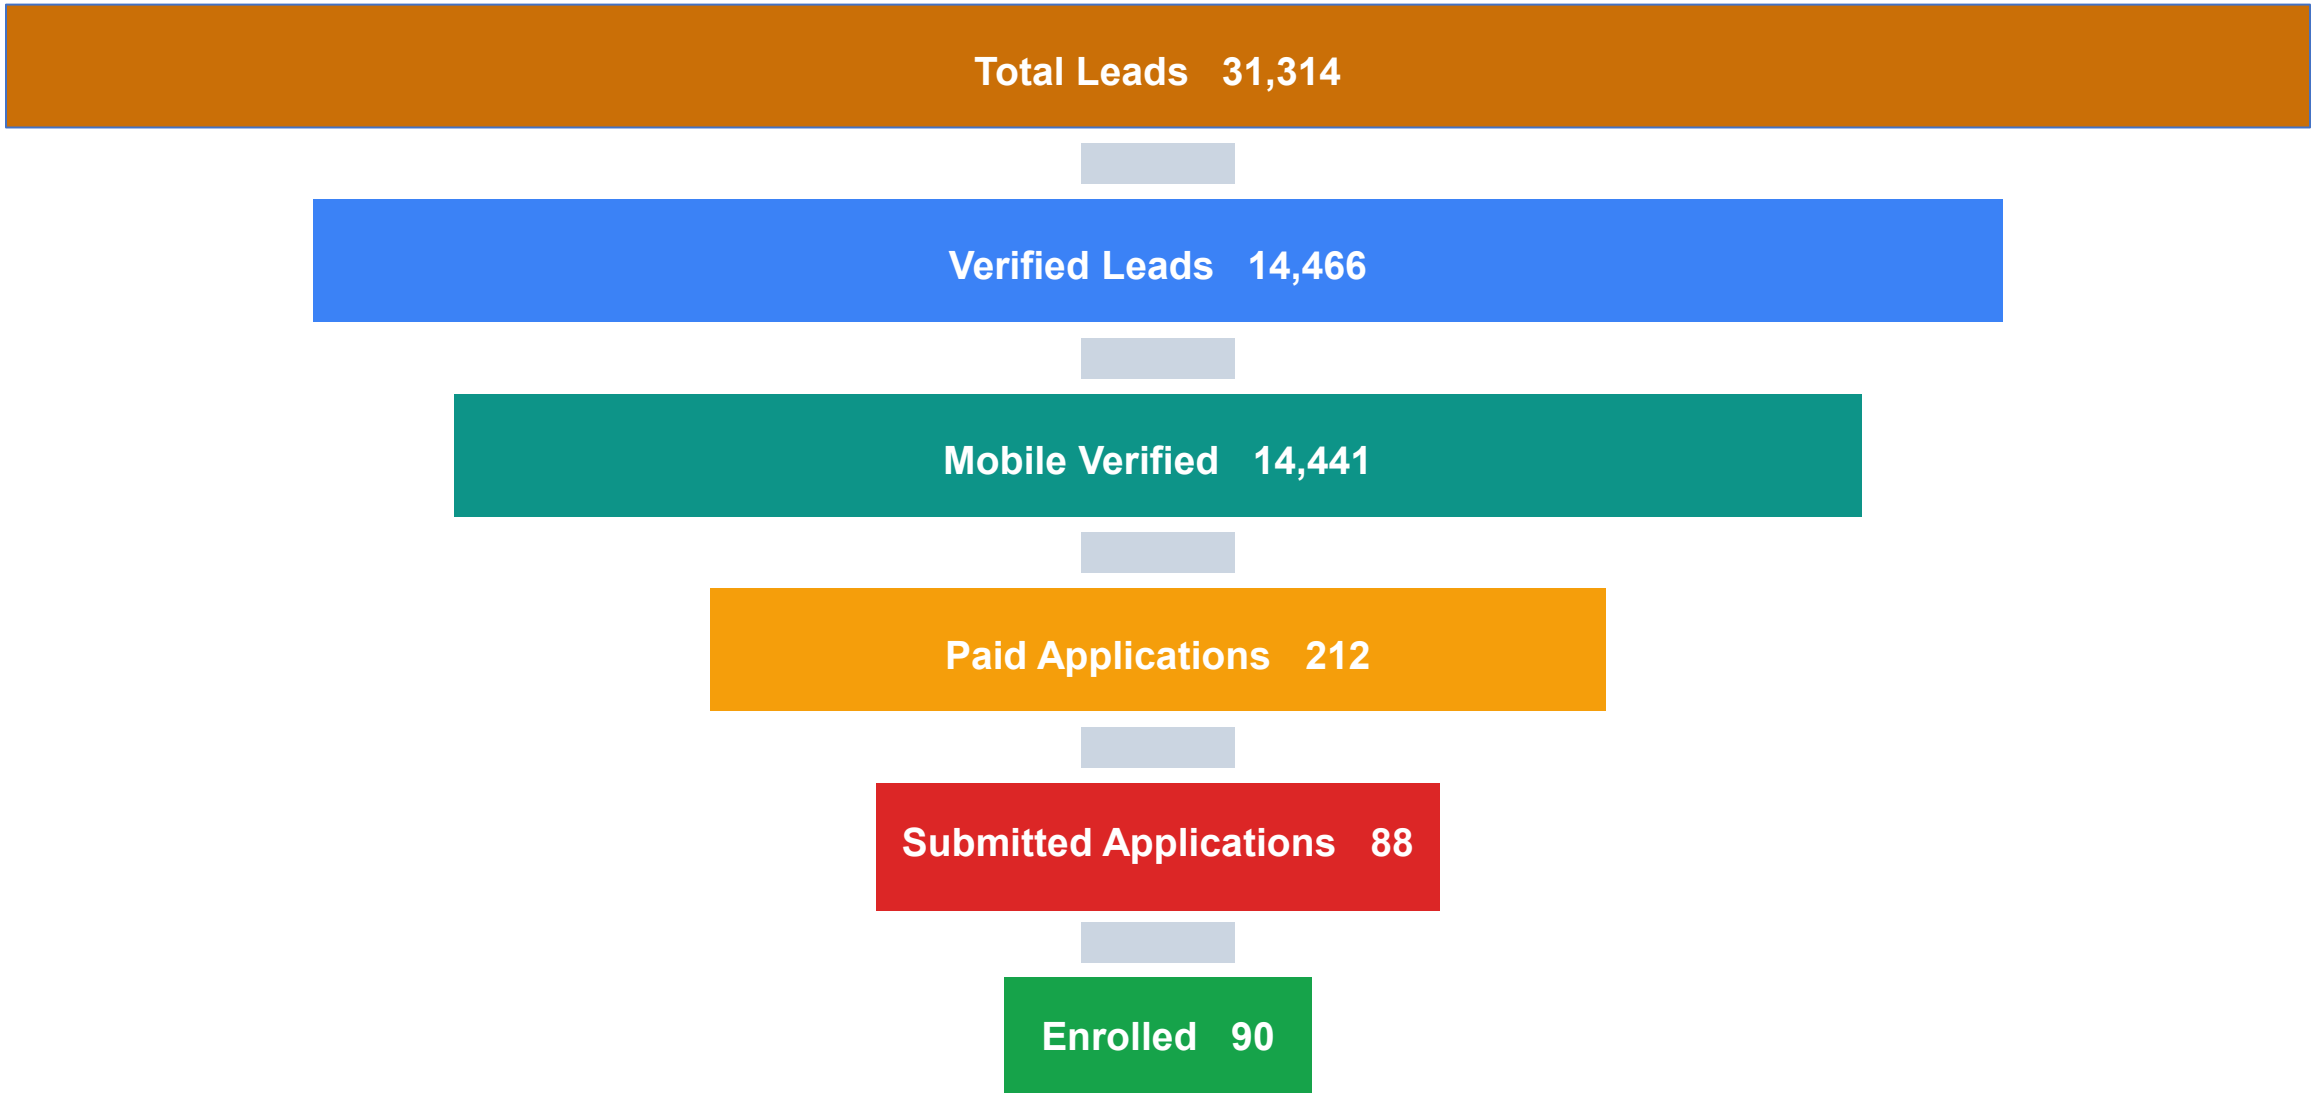
MONTHLY LEAD VOLUME TREND (Mar – Aug 2025)



As per Trend the highest ever leads generated in July month **which is about 33.56% of total**. After that we can see in august highly drop off in leads.

The 2nd & 3rd highest month of lead generation is may and June **which is 46.6% of total**.

CONVERSION FUNNEL ANALYSIS



Only 0.29% of leads convert to enrolment -- the biggest drop is between Verified (14,466) --- Applications (212). Focus: application-stage following for verified leads.

Key Insights & Recommendations

🔴 Critical: Low Conversion (0.29%)

HIGH

Implement a swift and personalised counselling process for verified leads. Develop and execute customised email and call journeys, ensuring outreach begins within 24 hours of lead verification.

🟡 Verification Gap (53.8% Unverified)

HIGH

Implement mandatory One-Time Password (OTP) email verification during the sign-up process. After that, utilize an automated SMS and email sequence to re-engage with leads whose email addresses remain unverified.

🟠 API Channel Over-Reliance (98.4%)

MED

Diversify acquisition channels. Invest in Online, paid social (Meta/Google), and optimize widget placements.

📍 North India Concentration (55.7%)

HIGH

Assign dedicated executive for UP, Punjab & Bihar. Launch pan-India campaigns to capture underserved regions.

📱 Mobile-First Audience (66.5%)

HIGH

Ensure all customer interactions, including WhatsApp communications, mobile-first landing pages, and in-app notifications, are fully optimized for the mobile experience.

📉 Seasonal Dip in Aug-25 (−73.9%)

MED

Allocate campaign budgets for the June–July peak period in advance. Analyse the August decline to ensure spending aligns with the admission cycle timeline.

Summary

This project involved cleaning and analysing college lead data to develop an interactive insights Charts.

The Charts and Graphs provides key insights into lead generation, student segmentation, and conversion performance across the admission funnel. It helps identify drop-offs, high-performing programs, and regional trends, produce data-driven decision-making and improved enrolment strategies.
