Colleges 2 Dump Analysis

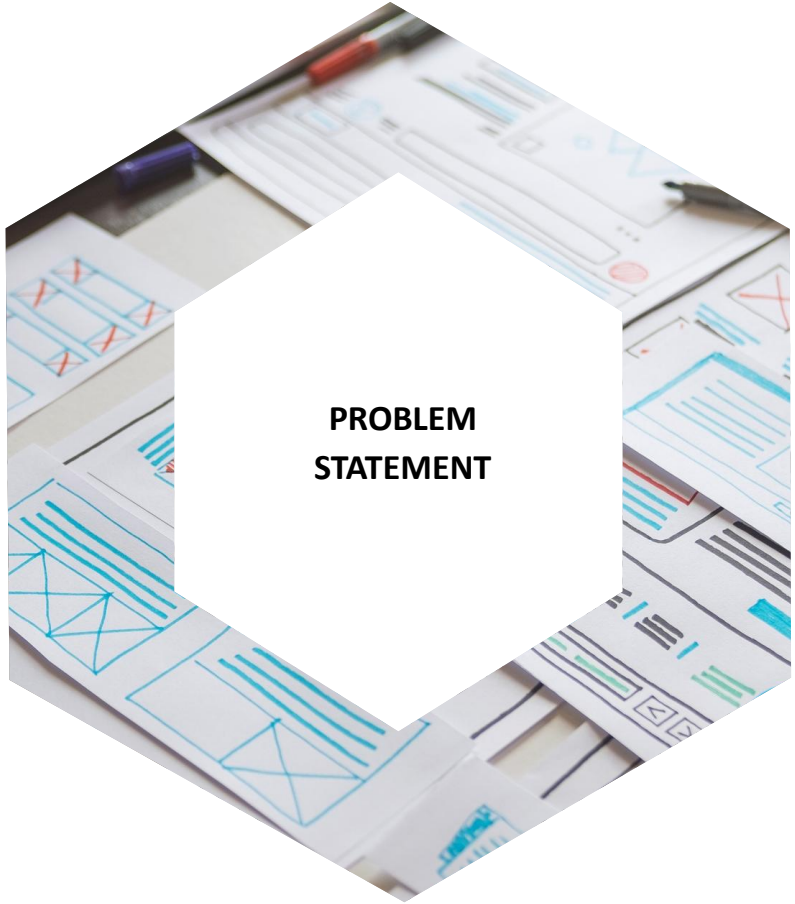
Insights & Business Observations

Data Period: Mar 2025 – Aug 2025 | **Total Records:** 56 Leads

Overview

- **In Today's time there are lots of competition between all colleges and they generate lots of students leads.**

- **This project focused on the colleges lead data to analyze raw data to actionable business Insights and Recommendation into Student's behaviors, conversion rate, demographic analysis for meaningful business insights for better Decision-making**



PROBLEM STATEMENT

- The institution faces lots of challenges like unstructured data, lacks of facing visibility in admission funnel and difficulty in identify the demographic drop offs and high performing Region.

  This results in inefficient decision-making and missed opportunities for improving conversions. Although, we have to Give the problem Analysing Report to the Institution.

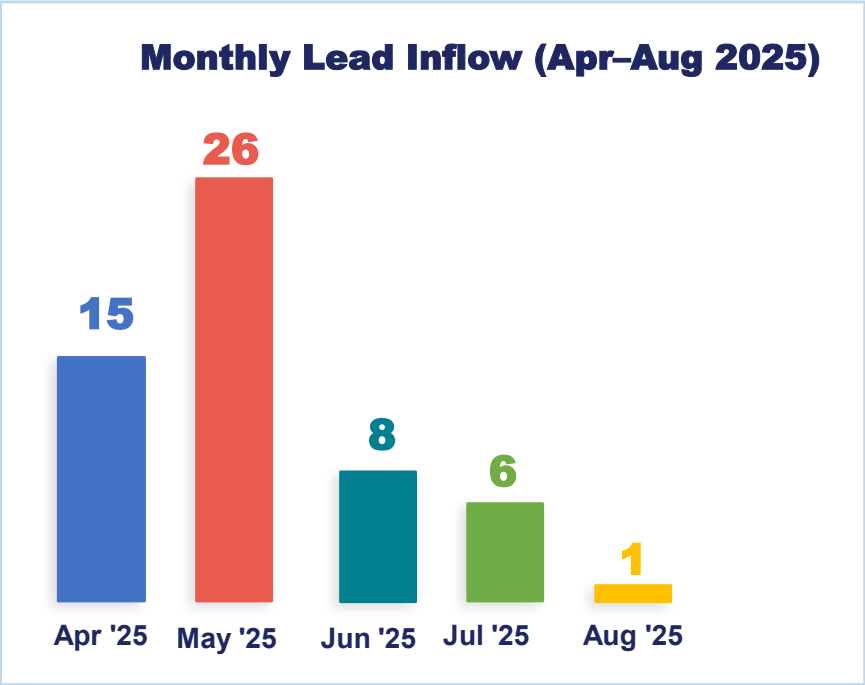
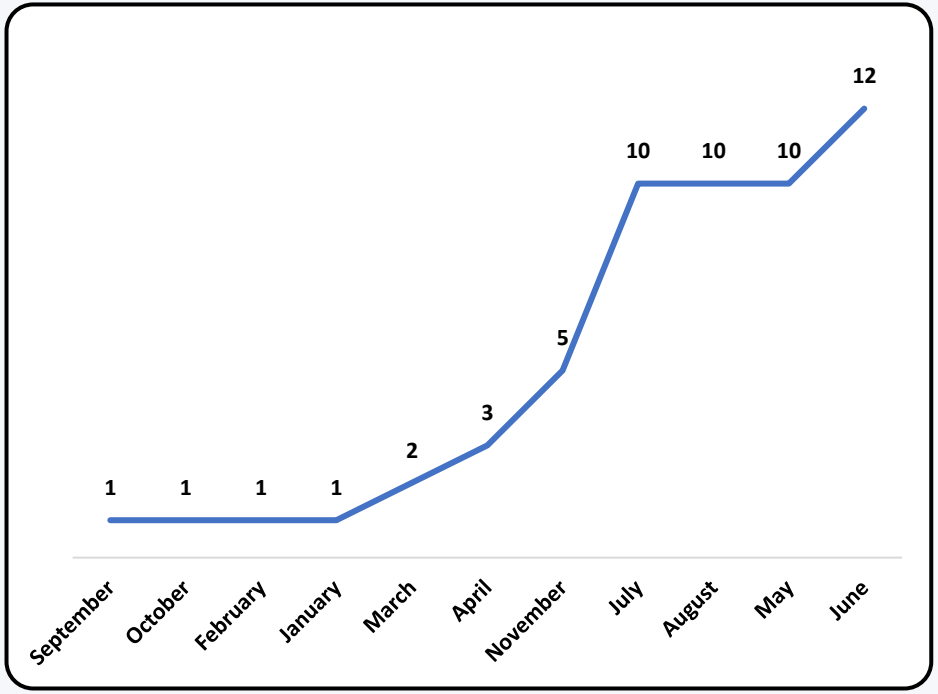
Lead inflow pattern from April to August 2025





🚀 **Peak: May 2025 with 26 leads — the highest monthly intake, possibly driven by admissions season.**

📉 **Sharp decline after May — Jun (8), Jul (6), Aug (1). Indicates seasonal tapering post application deadline.**

Application & Conversion Funnel

Total Leads in System	56 (100%)
Verified (Email or Mobile)	56 (100%)
Form Initiated	56 (100%)
Paid Application Submitted	56 (100%)
Enrolled	56 (100%)

Key Insights & Recommendations

NCR Dominance

The majority of leads (77%) originate from Delhi and Uttar Pradesh. Focus resources on deeper penetration in these key markets, while also initiating outreach efforts in Rajasthan, Punjab, and Madhya Pradesh.

Untouched Leads Risk

15 leads (26.8%) are 'Untouched & Applied'. These need immediate follow-up to prevent drop-off.

B.Tech CSE Monopoly

44.6% of leads want CSE. Diversify marketing for MBA, Liberal Arts, and Sciences to balance intake.

Mobile-First Opportunity

Only 8.7% of Online leads use mobile devices. A mobile-optimized landing page could increase conversions.

Email Verification Gap

44.6% of emails are unverified. Launch email re-verification campaigns to improve deliverability.

Seasonal Strategy

Lead volume peaks in May and drops sharply post-June. Plan admission campaigns earlier (Mar–Apr) to capture peak intent.
